Subject: Microsoft Settlement

I OPPOSE the Microsoft settlement on the following grounds:

1. Microsoft has a long history of UNDERMINING COMPETITION by either "buying up" and shelving competing products, or by threats of restriction of Windows licenses to PC manufacturers who use competitive products.
2. Microsoft has poured extensive money into false and misleading lobbying campaigns, including the use of DEAD PEOPLE as signatories in lobbying campaigns.
3. Microsoft willfully and purposefully distorted and misled the Justice Department in regards to the rulings of Judge Jackson in the 1990's and DELAYED final ruling until Netscape Communications and other Internet pioneers were destroyed by Microsofts marketing and bundling tactics.

I personally find the behavior of Microsoft and it's chief officers appalling and DEMAND that my government act in the interests of it's CITIZENS and pushing Microsoft for it's arrogant, willful and purposeful monopolistic behavior. BREAK MICROSOFT UP!
